Key State geoscientist joins Marmota as Exploration Geologist

One of South Australia's key geoscientists in the resources sector has joined newly listed uranium explorer, Marmota Energy Limited, as an Exploration Geologist.

Mr Daniel Gray joins Marmota from his most recent position as State Gravity Coordinator for the South Australian Government where he was responsible for the design and management of a variety of geoscience programs designed to reduce exploration risk.

As State Gravity Coordinator, Mr Gray oversaw the largest industry/government joint funded regional gravity acquisition program ever conducted in South Australia.

He has strong expertise as a geologist and geophysicist and working as part of an energetic team will be tasked with designing and implementing exploration programs across Marmota's stable of tenements. He is particularly well suited to work on the Company's flagship and adjoining Ambrosia and Mulgathing uranium prospects, northwest of Tarcoola in South Australia's far west.

Marmota's Managing Director, Mr Dom Calandro, said Mr Gray's appointment as Exploration Geologist was "something of a coup, at a time of exceptionally high demand for such expertise in the resources sector".
