

ASX ANNOUNCEMENT

2 September 2024

# Aurora Tank Gold

## Drilling completed

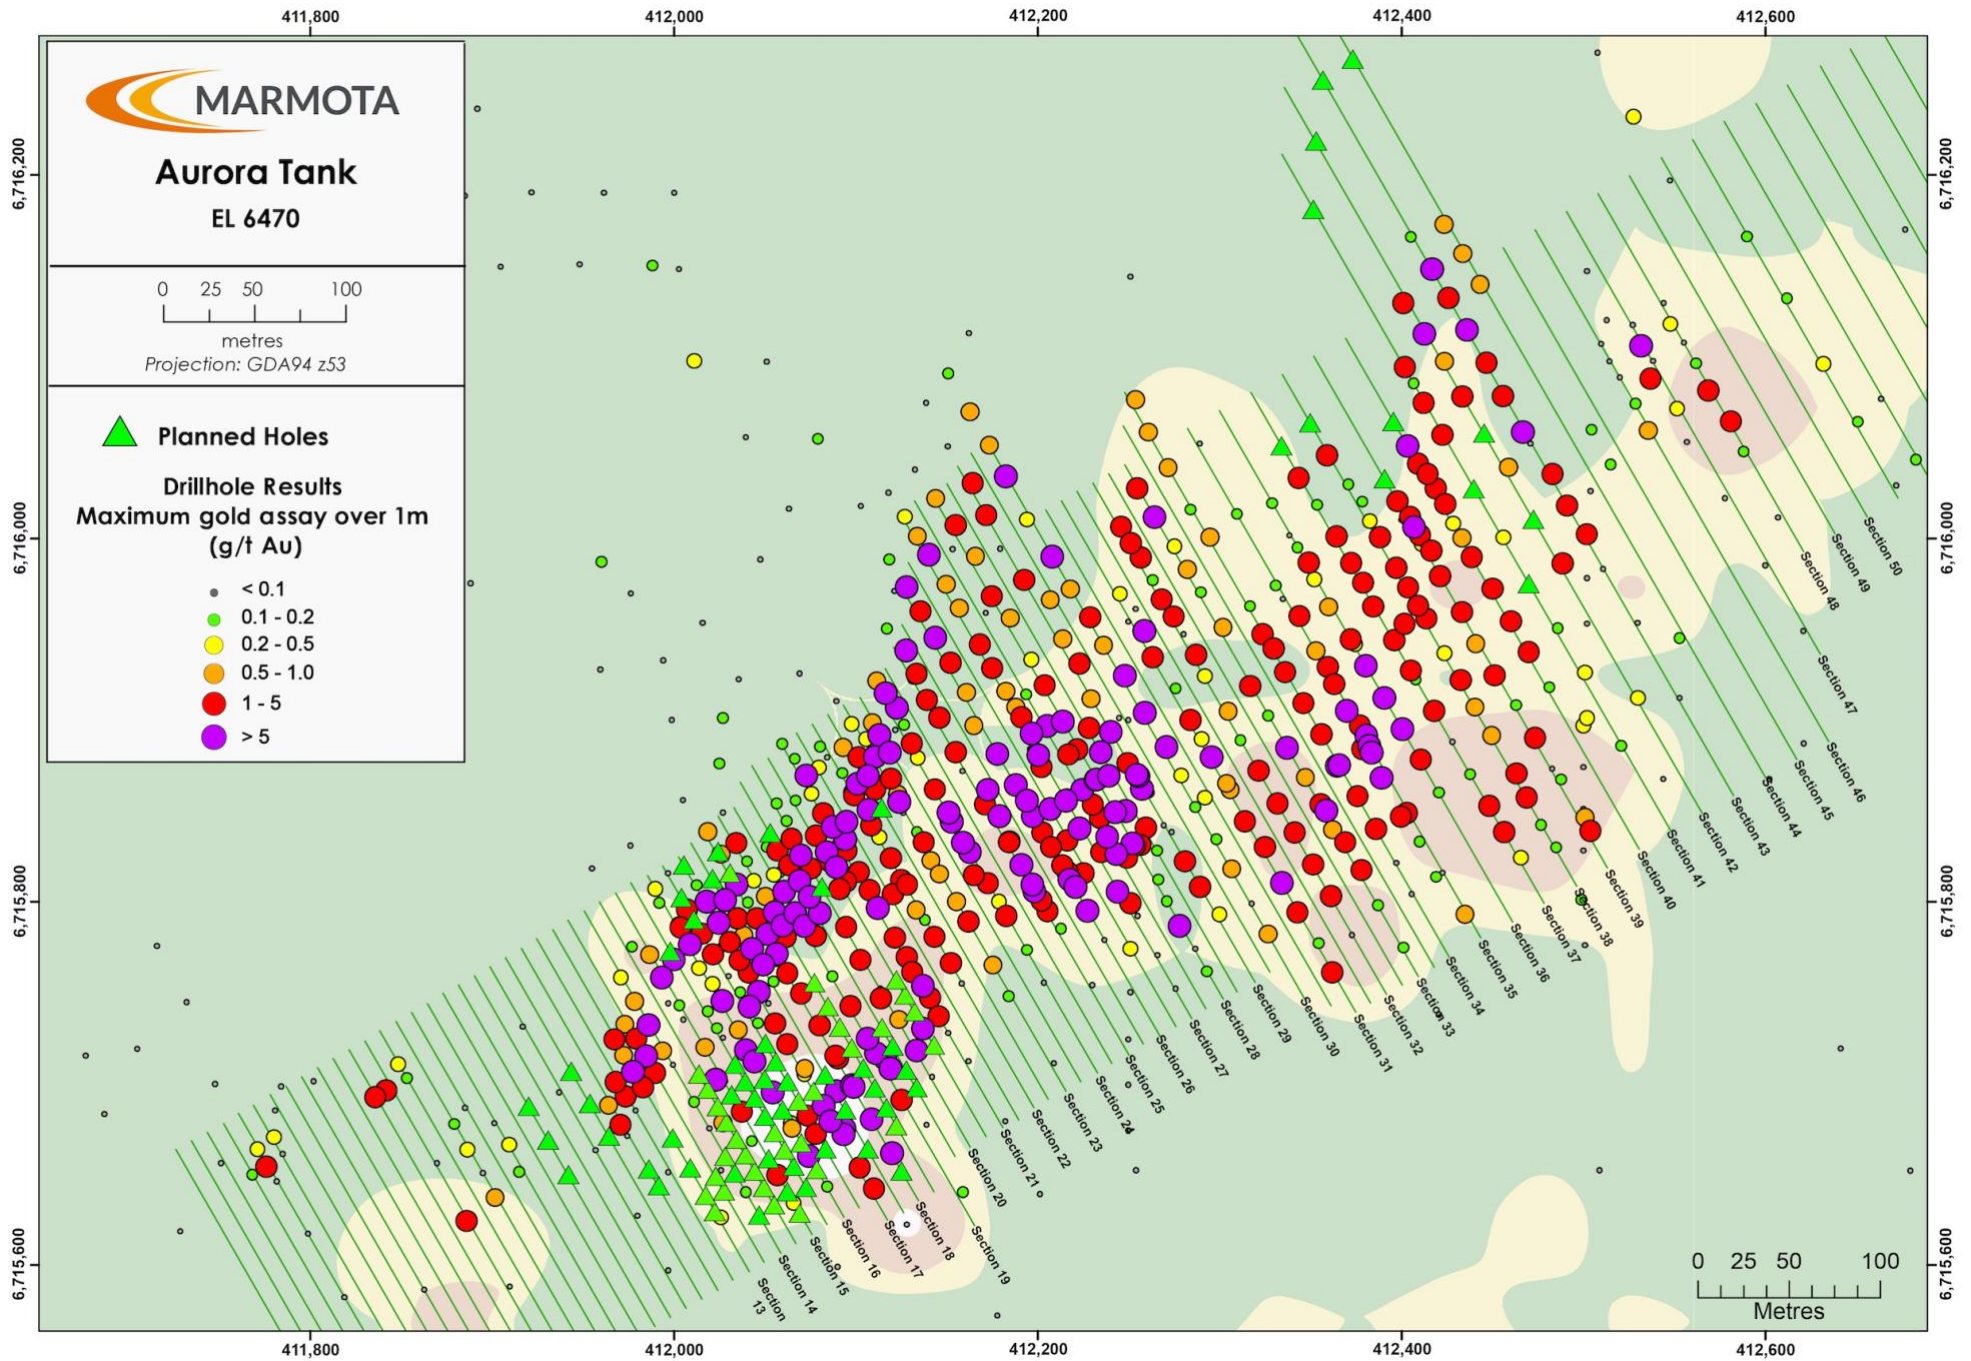

---

Marmota Limited (ASX: MEU) ("Marmota")

Marmota (ASX:MEU) is very pleased to announce that the **July/August 2024 drilling program at Marmota's flagship gold discovery at Aurora Tank has completed.**

### Aurora Tank gold RC program

- **RC Drill program:** 90 holes (up from 58 holes originally planned ASX:MEU 29 July 2024 )
- **Total RC drilling:** 7,692m (up from 5,200m originally planned ASX:MEU 29 July 2024 )
- **Hole depths:** ~ 85m (average)
  
- For overview of hole locations, see [Figure 1](#).
- All samples have been collected and will shortly be delivered to Adelaide for laboratory testing.
- Aurora Tank assay results are currently expected in early October.

## Fly-by video

A fly-by video shows recent drilling in action at Aurora Tank:

<https://youtu.be/o8-B43ZBQwA>

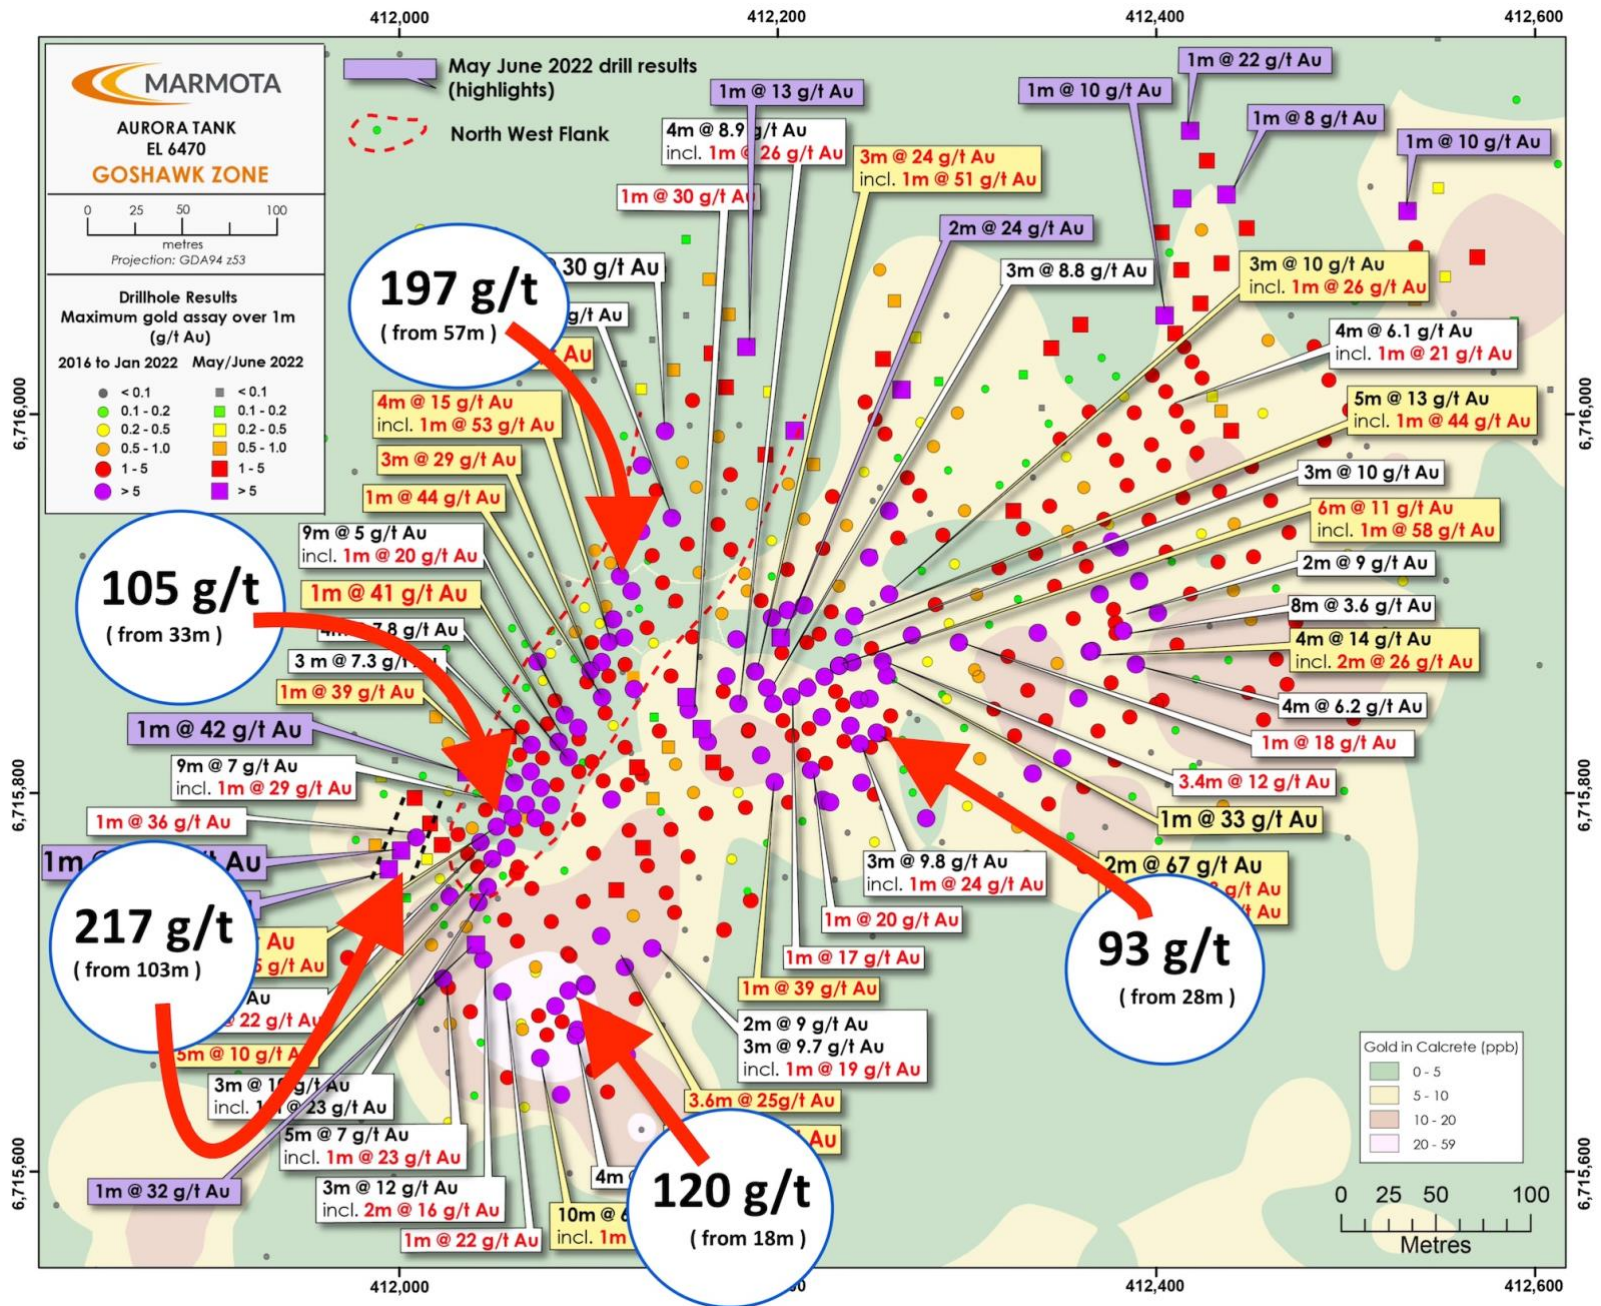

## Background

- Marmota's Aurora Tank gold discovery features outstanding gold intersections, now with 5 different zones featuring bonanza gold grades close to surface.
- The project is now at an advanced stage.
- The Aurora Tank metallurgical testwork program is progressing extremely well and is now more than 85% complete: its role is to optimise gold recoveries from a low-cost open-pittable heap leach production pathway.
- The gold price is at record highs, and has more than doubled since Marmota first started work at Aurora Tank just a few years ago, on a project that was always conceived as a low-cost, low capex model.

## Purpose of RC program

- Marmota is seeking to finalise the design of an open-pit at Aurora Tank.
- The main purpose of the program is to try and close off a number of sections that remain open: to the south, west, east, north and also at depth, focusing on significant open-pittable mineralisation.
- Some holes are targeting locations where previous drilling was far too shallow.
- Some in-fill drilling was also planned to assist resource estimation.

**About Marmota Limited**

Marmota Limited (ASX: MEU) is a South Australian mining exploration company focused on gold and uranium. Gold exploration is centred on the Company's gold discovery at Aurora Tank that is yielding outstanding intersections in the highly prospective and significantly underexplored Gawler Craton in the Woomera Prohibited Defence Area. The Company's flagship uranium resource is at Junction Dam adjacent to the Honeymoon mine.

**Competent Persons Statement**

Information in this Release relating to Exploration Results is based on information compiled by Aaron Brown, who is a Member of The Australian Institute of Geoscientists. He has sufficient experience relevant to the styles of mineralisation and types of deposits under consideration and to the activities being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code of Reporting of Exploration Results, Mineral Resources and Ore Reserves." Mr Brown consents to the inclusion in this report of the matters based on this information in the form and context in which they appear.

The information in this announcement that relate to Mineral Resource estimates that are now within the Golden Moon JV come from the Tyranna ASX:TYX release of 30 May 2018, and is based on information compiled by Richard Maddocks who is a Fellow of the Australasian Institute of Mining and Metallurgy, and who was an independent consultant to Tyranna Resources Ltd. Please see the Tyranna release for more details.

Where results from previous announcements are quoted, Marmota confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcement and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.

For the purpose of ASX Listing Rule 15.5, the Board has authorised for this announcement to be released.
