MEU transforming the Gawler gold discoveries

RC Drilling at Greenewood /Mainwood

	BEFORE MEU 2003 – 2017	MEU Maiden Program* July 2025 – 2026
Mainwood zone	~ 3,700 m	~ 19,000 m
Greenewood zone	~ 7,000 m	~ 39,000 m
TOTAL RC metres	~ 10,700 m	~ 58,000 m

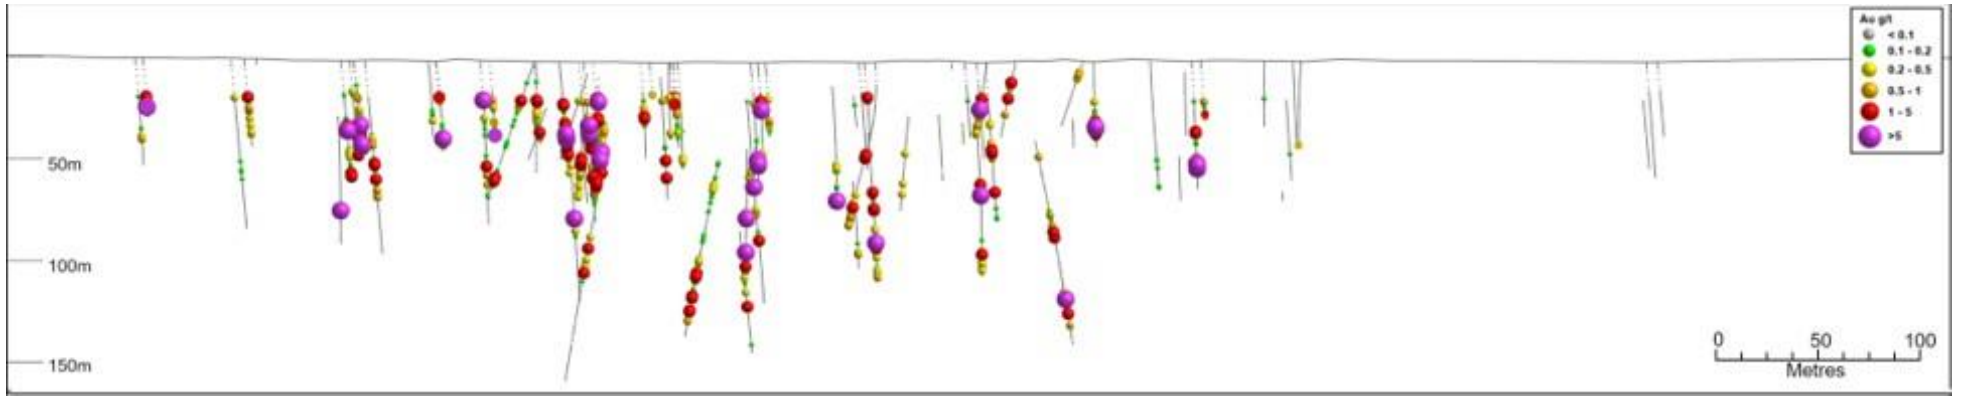

- Marmota has drilled more than 58,000m RC since commencing its maiden program in July 2025, transforming the deposits in less than 1 ½ years.

Greenewood Long Section

see ASX:MEU 26 Oct 2026

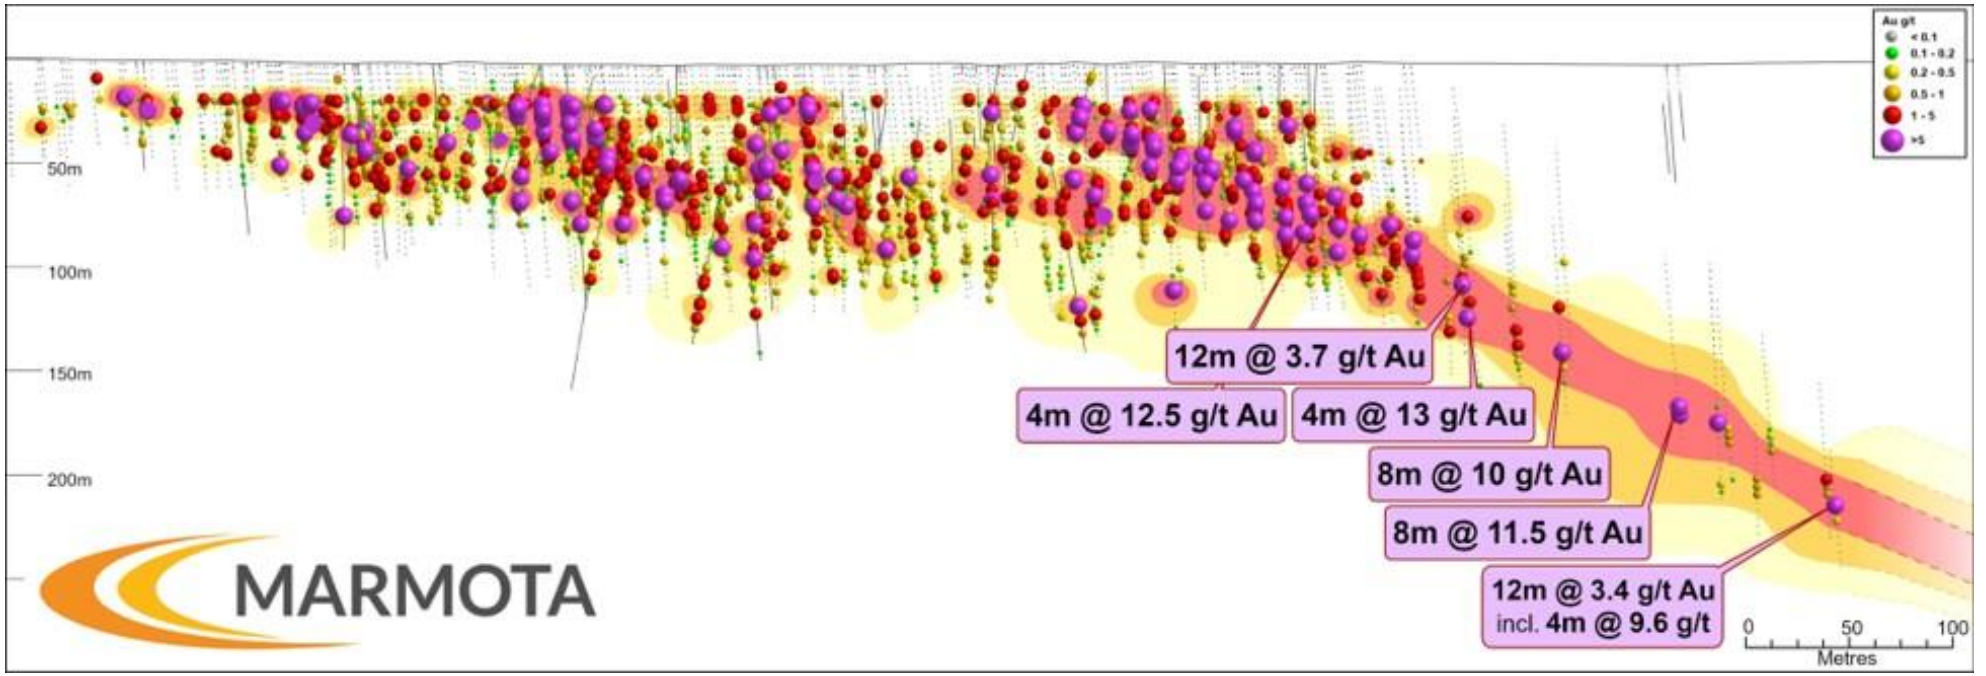

BEFORE

MEU Maiden Program

AFTER

MEU Maiden Program

Gawler Gold Outstanding progress in 2026

1. **Greenewood/Mainwood gold discovery:**
   - Maiden MEU drill program: BONANZA grades at both Greenewood and Mainwood
   - **Huge high-grade extensions** to both ends of the deposit (NORTH and SOUTH)
   - Best gold results in the Gawler Craton since the discovery of Challenger in 1995

2. **SCALE**:
   - Greenewood/Mainwood mineralisation now extends over 2km and at depth
   - Continuous high grade gold zones identified
   - part of arc of adjacent gold deposits featuring bonanza grades

4. **MEU Maiden Gold programs**:
   - MEU drilling programs are *transforming* the Gawler Gold resources
   - aiming to carry out sufficient drilling to yield ***indicated*** level of JORC resource confidence, which is required for scoping study

5. **Scoping Study**: low-cost low-capex pathway
   - commenced and making excellent progress
   - update coming soon

Greenewood / Mainwood

Maiden MEU drill program

(Stage 1 completed Aug 2025)
(Stage 2 completed Dec 2026)
(Stage 3 completed Oct 2026)

- **Some of the best gold results seen in the Gawler Craton since the discovery of Challenger in 1995**
- **Bonanza gold grades + Thick intervals**
- **NEW high grade extensions at depth … just keeps on going ….**
- **Delineated nearly continuous high-grade discovery at Greenewood**
- **TRANSFORMED the deposits (see next slide)**

2026 program

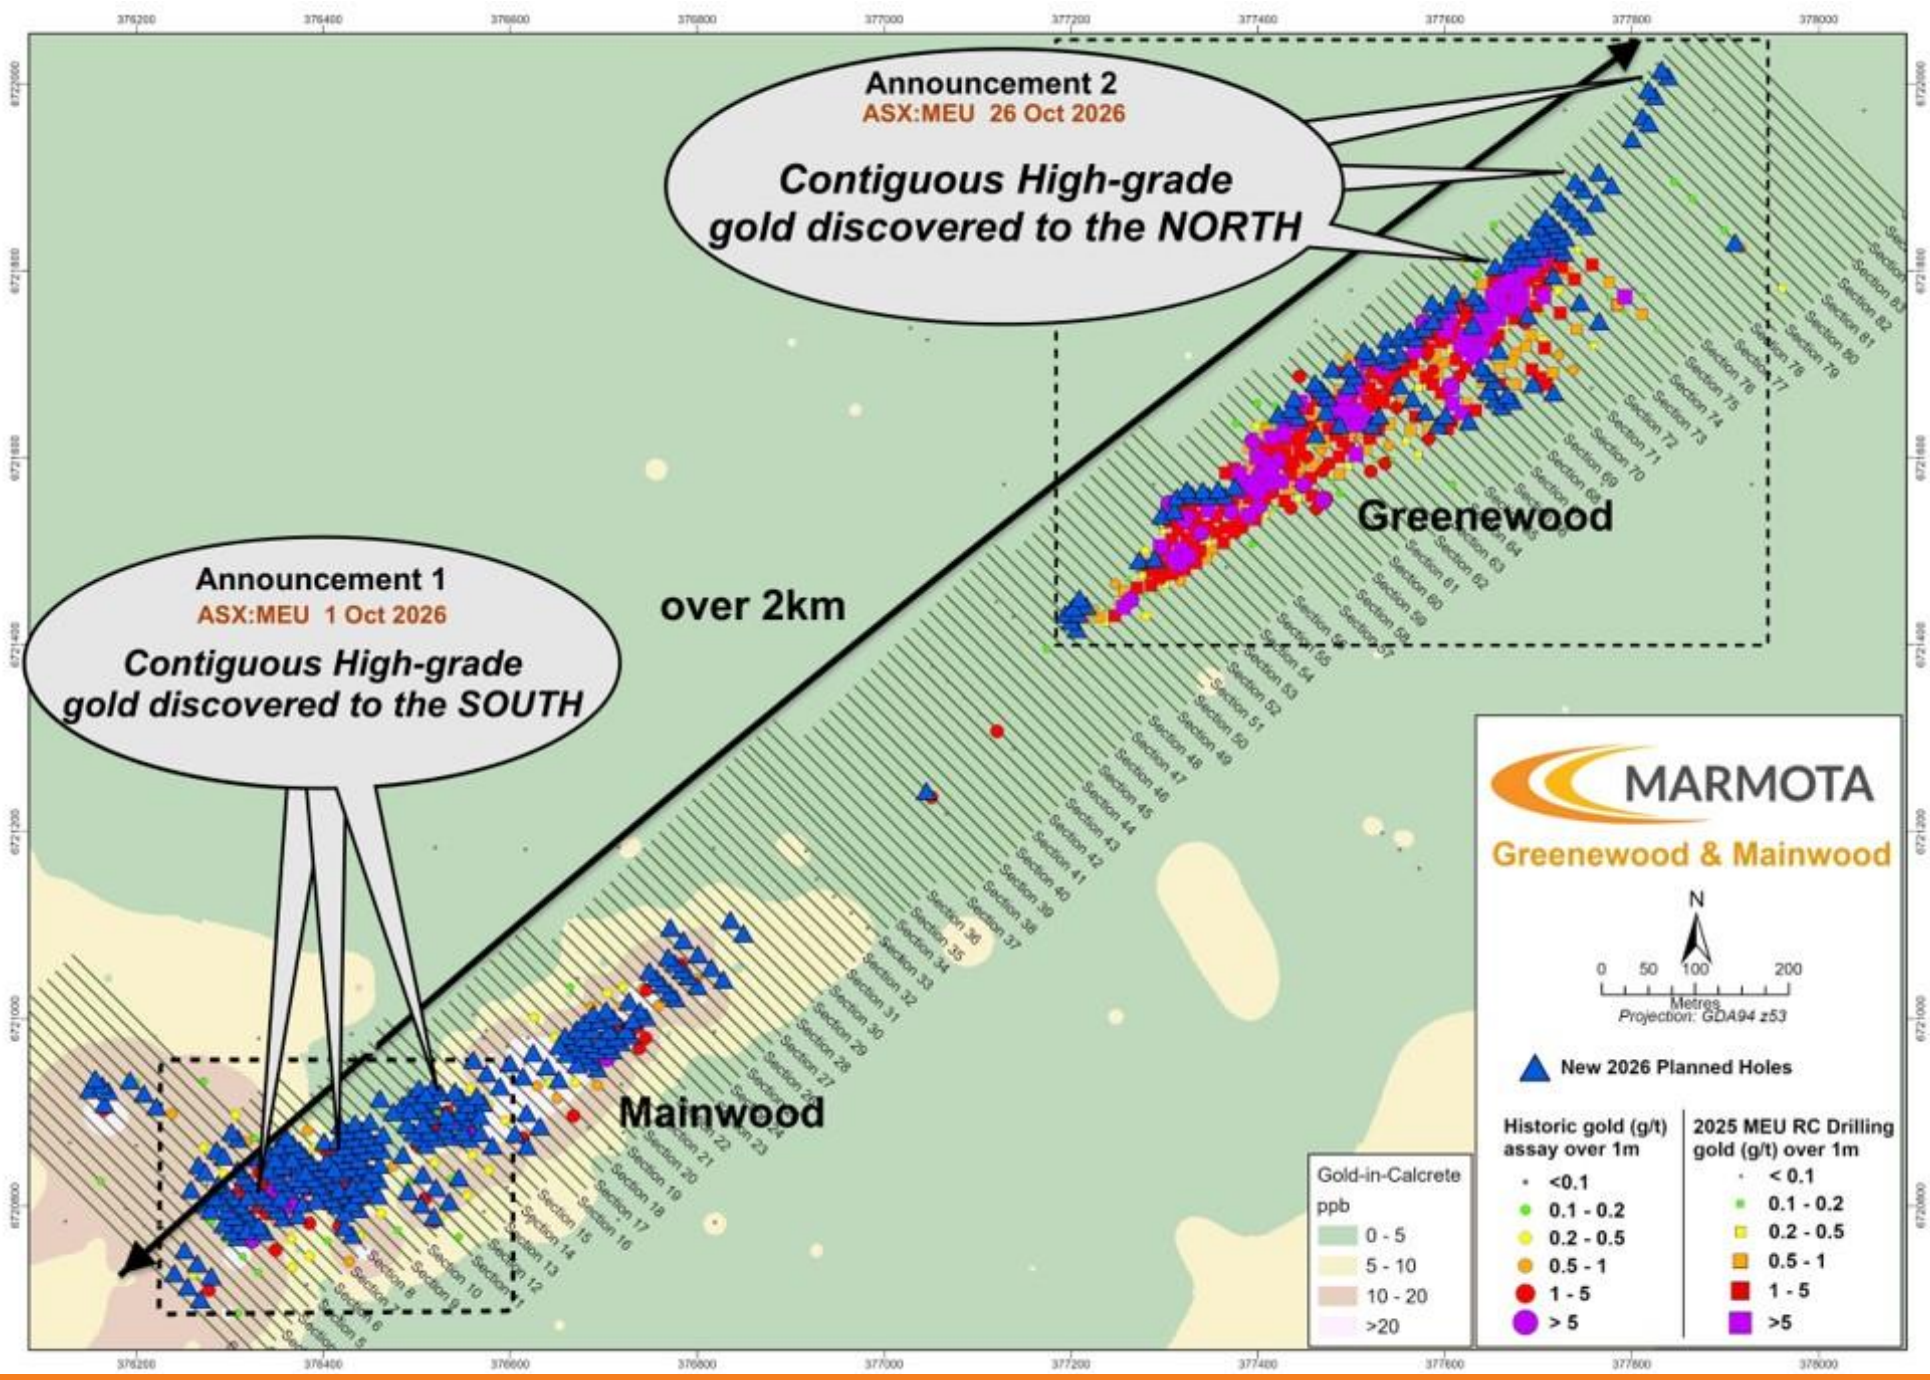

The primary objectives of the 2026 program:

	Program objectives	Status
1	**Northern extensions and to depth** • to extend Greenewood, particularly to the North	**Highly successful**
2	**Southern extensions** • to try to identify a contiguous high-grade gold zone in our maiden drilling in Greenewood's extension to the south (called Mainwood)	**Highly successful**
3	**To significantly grow the resource**	Strike massively extended to over 2km. Next steps: remaining 4m composite assays still arriving, then detailed 1m assays, to feed into MEU Gawler Gold resource model
4	**To increase the density of drilling,** including drilling missing sections, to enable an indicated resource for Greenewood that is necessary for the Gawler Gold Scoping study.	**Done**

Greenewood and Mainwood

2026 program

Plan collar diagram

ASX:MEU 1 Oct 2026
26 Oct 2026

Maiden MEU drill program

(Stage 1 completed Aug 2025)
(Stage 2 completed Dec 2026)
(Stage 3 completed Oct 2026)

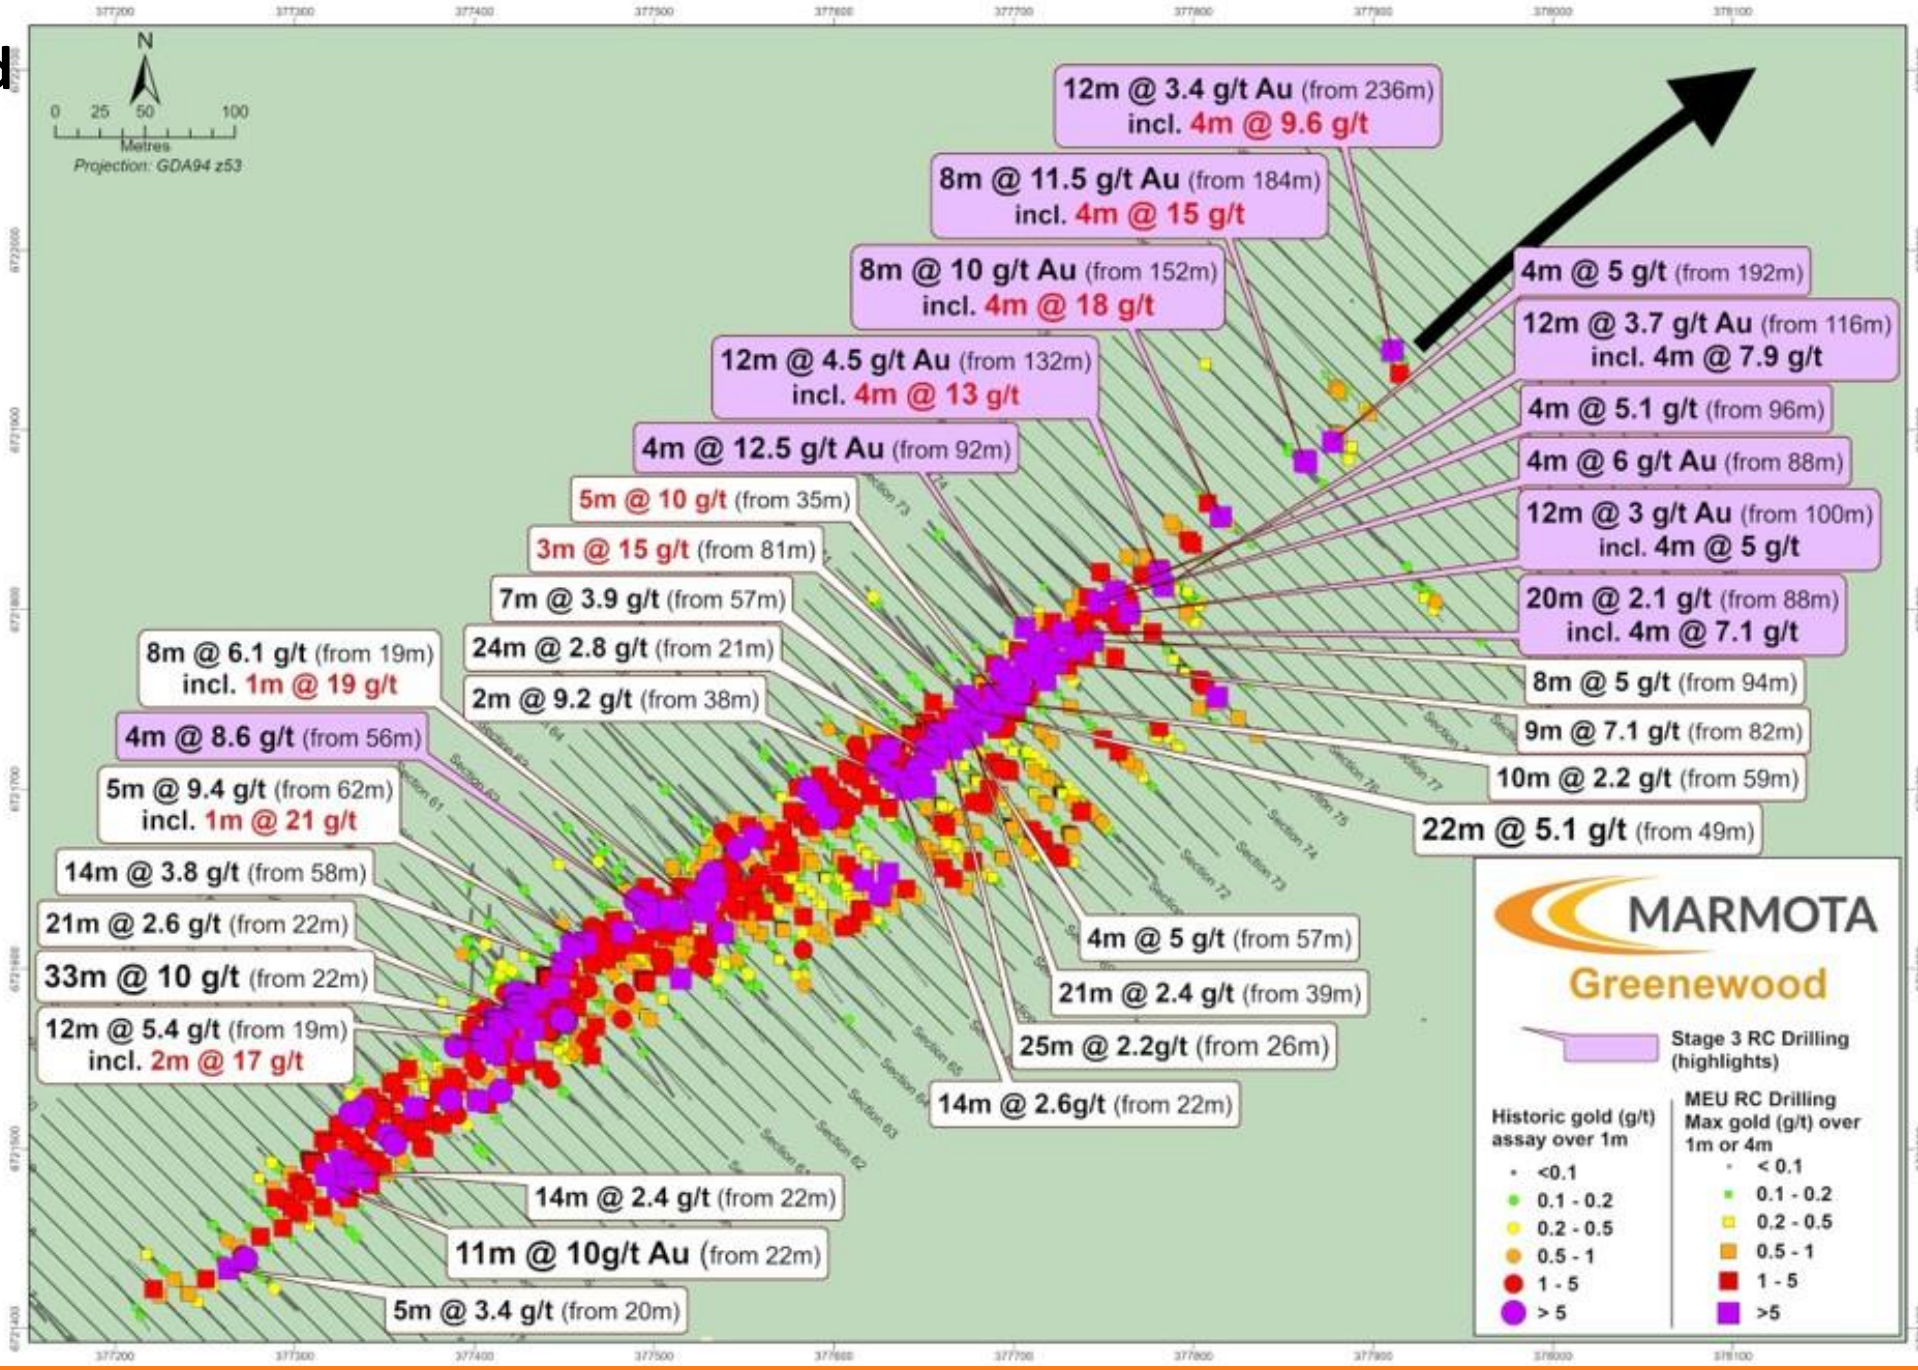

Stage 3 … *recently completed in Oct 2026*

- **expanded the contiguous high-grade strike to the NE and to depth, and remains fully open**
- **doubling the known strike of identified high-grade gold zones**
- **remarkable geological continuity and predictability**

Greenewood

Plan Overview

Projection to surface

ASX:MEU 26 Oct 2026

Greenewood Maiden Program Highlights

Best gram-metre intersections (MEU Drilling *so far*)

Hole numbers marked * are Stage 1 results [see ASX:MEU 11 Dec 2025].

Hole numbers marked ** are Stage 2 results [see ASX:MEU 28 May 2026].

MULTIPLE outstanding intersections featuring over 40 gram-metres gold

(*i.e.* average Au g/t x length of intersection in metres).

Stage 1	• 330 gram-metres	33m @ 10 g/t gold	(from 22m downhole)	in Hole 25GWRC046 *
	• 112 gram-metres	22m @ 5.1 g/t gold	(from 49m downhole)	in Hole 25GWRC099 *
	• 50 gram-metres	11m @ 4.5 g/t gold	(from 21m downhole)	in Hole 25GWRC101 *
	• 53 gram-metres	14m @ 3.8 g/t gold	(from 58m downhole)	in Hole 25GWRC054 *
	• 58 gram-metres	18m @ 3.2 g/t gold	(from 21m downhole)	in Hole 25GWRC112 *
	• 67 gram-metres	24m @ 2.8 g/t gold	(from 21m downhole)	in Hole 25GWRC129 *
	• 50 gram-metres	21m @ 2.4 g/t gold	(from 39m downhole)	in Hole 25GWRC130 *
	• 55 gram-metres	25m @ 2.2 g/t gold	(from 26m downhole)	in Hole 25GWRC094 *
Stage 2	• 65 gram-metres	12m @ 5.4 g/t gold	(from 19m downhole)	in Hole 25GWRC160 **
	• 50 gram-metres	5m @ 10 g/t gold	(from 35m downhole)	in Hole 25GWRC208 **
	• 47 gram-metres	5m @ 9.4 g/t gold	(from 62m downhole)	in Hole 25GWRC233 **
	• 64 gram-metres	9m @ 7.1 g/t gold	(from 82m downhole)	in Hole 25GWRC249 **
	• 49 gram-metres	8m @ 6.1 g/t gold	(from 19m downhole)	in Hole 25GWRC173 **
	• 40 gram-metres	8m @ 5.0 g/t gold	(from 94m downhole)	in Hole 25GWRC253 **
	• 45 gram-metres	3m @ 15 g/t gold	(from 81m downhole)	in Hole 25GWRC241 **
	• 55 gram-metres	21m @ 2.6 g/t gold	(from 22m downhole)	in Hole 25GWRC162 **

Greenewood Maiden Program Highlights

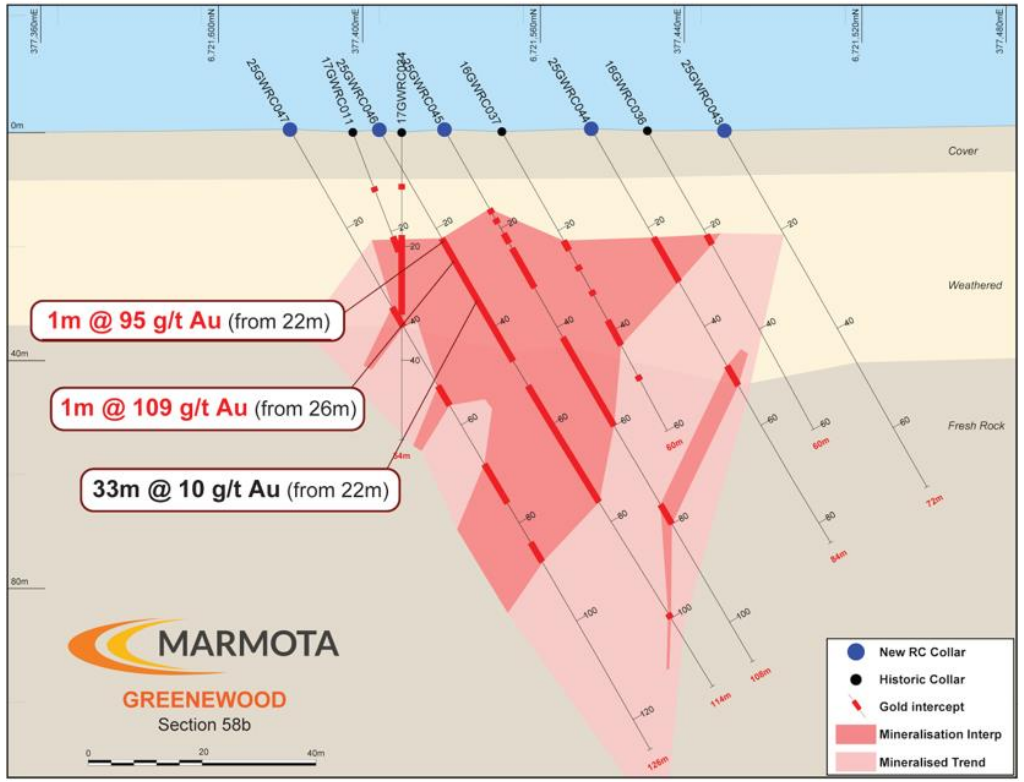

Best gram-metre intersections (2026 MEU Drilling *so far*)

Stage 3	• 92 gram-metres	8m	@	11.5 g/t gold	(from 184m downhole)	in Hole 26GWRC035 *** (b)
	• 80 gram-metres	8m	@	10 g/t gold	(from 152m downhole)	in Hole 26GWRC034 *** (b)
	• 67 gram-metres	16m	@	4.2 g/t gold	(from 24m downhole)	in Hole 26MWRC177 ***(a)
	• 62 gram-metres	20m	@	3.1 g/t gold	(from 32m downhole)	in Hole 26MWRC014 ***(a)
	• 59 gram-metres	28m	@	2.1 g/t gold	(from 36m downhole)	in Hole 26MWRC149 ***(a)
	• 54 gram-metres	12m	@	4.5 g/t gold	(from 132m downhole)	in Hole 26GWRC016 *** (b)
	• 52 gram-metres	4m	@	13 g/t gold	(from 28m downhole)	in Hole 26MWRC013 ***(a)
	• 50 gram-metres	4m	@	12.5 g/t gold	(from 92m downhole)	in Hole 26GWRC080 *** (b)
	• 45 gram-metres	12m	@	3.7 g/t gold	(from 116m downhole)	in Hole 26GWRC002 *** (b)
	• 43 gram-metres	16m	@	2.7 g/t gold	(from 56m downhole)	in Hole 26MWRC173 ***(a)
	• 42 gram-metres	20m	@	2.1 g/t gold	(from 88m downhole)	in Hole 26GWRC085 *** (b)
	• 41 gram-metres	12m	@	3.4 g/t gold	(from 236m downhole)	in Hole 26GWRC109 *** (b)
	• 50 gram-metres	24m	@	2.1 g/t gold	(from 24m downhole)	in Hole 26MWRC141 ***(a)

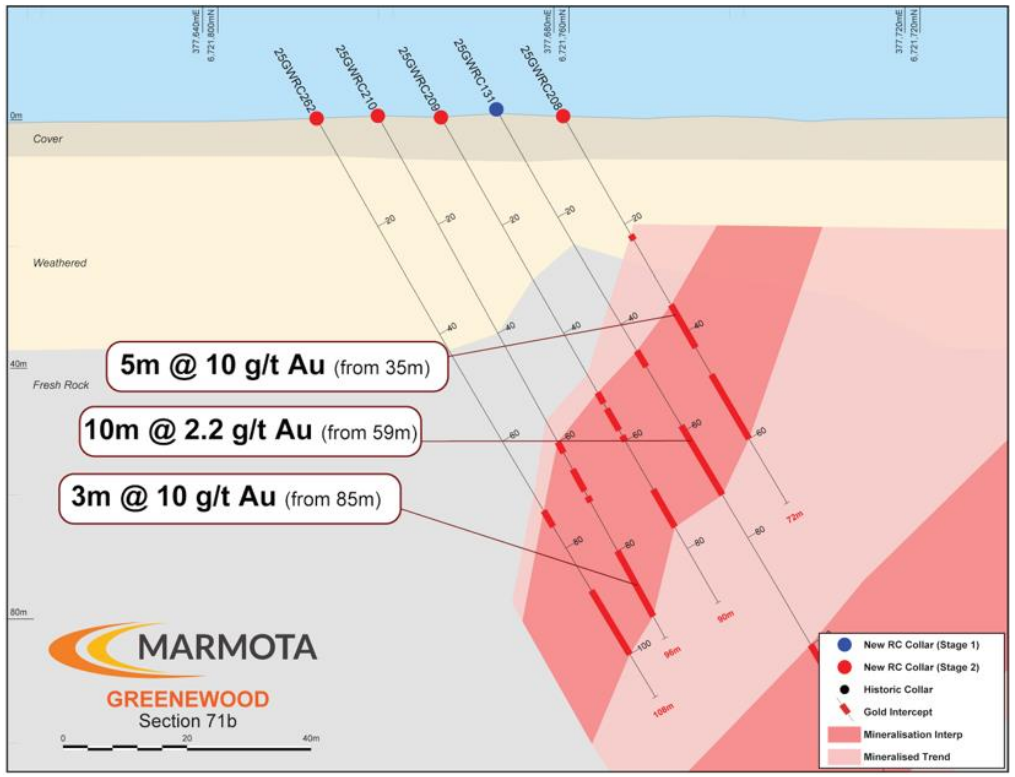

Hole numbers marked *** are Stage 3 results [see ASX:MEU 1 Oct 2026 (a) and 26 Oct 2026 (b)].

Cross-section 9

…. the maiden drilling program to the south of the Greenewood gold discovery (Mainwood zone) is **yielding outstanding gold assays, featuring the discovery of contiguous high-grade gold, starting close to surface, featuring thick wide intercepts that extend deeper to fresh rock.**

Gawler Gold Growing fast

To give some idea how quickly Greenewood has progressed:

At Aurora Tank: Time taken for the first 25,000m of MEU drilling was: 3 years

At Greenewood/Mainwood:

MEU drilling within the Greenewood and Mainwood zones has now ***exceeded 58,000metres***

…….in less than 1 ½ years.

More than twice the drilling in half the time: 5 times speed-up

Things are faster for a multitude of reasons, including the growth in Marmota itself; the advantages of scale; significantly improved availability to capital from MEU's exploration success; the increasing ease of operations with Marmota's established camp and growing infrastructure in the area, and because we are absolutely prioritising speed and resource growth.

Marmota Chairman, Dr Colin Rose, said:

"A key objective of our Gawler program is to grow the resource, and to increase the density of drilling to enable an **indicated resource** that is necessary for the **Gawler Gold Scoping study**.

We are ramping the pace up further, generating data as rapidly as possible so that we have the optimal answers to a variety of relevant production planning issues for Gawler Gold, including where we start first.

We are expecting **multiple significant announcements** to be released in the lead up to the Festive Season and continuing into the New Year."

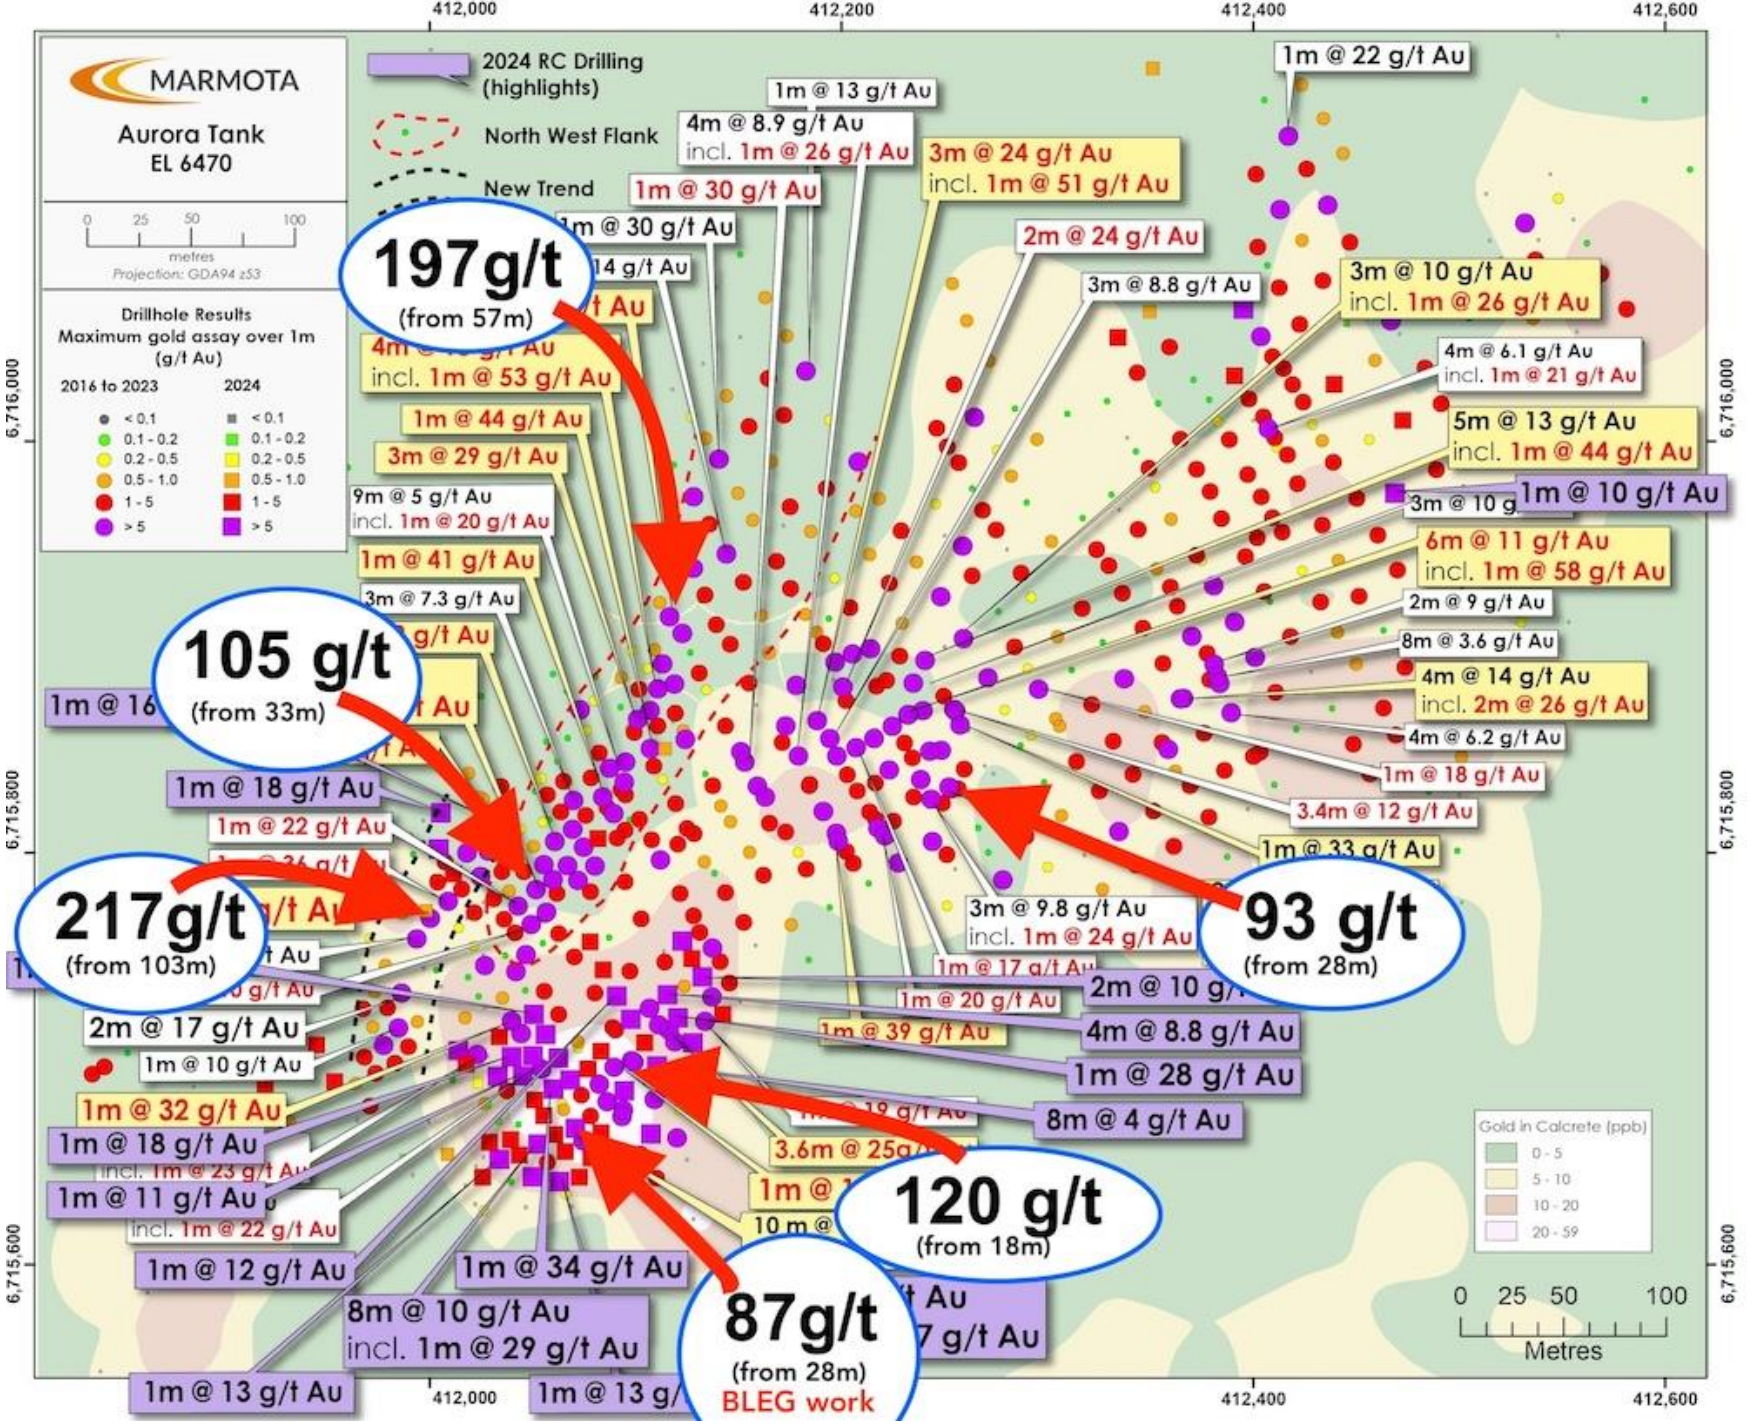

Aurora Tank

- Outstanding intersections
- Bonanza grades in multiple zones
- Predominantly close to surface
- Contiguous high grade mineralisation over 285m (NW Flank)
- Multiple zones open at depth
- Excellent metallurgy [ASX:MEU 28 April 2025]
- mine plan has commenced [ASX:MEU 28 Oct 2025]

MARMOTA

Uranium

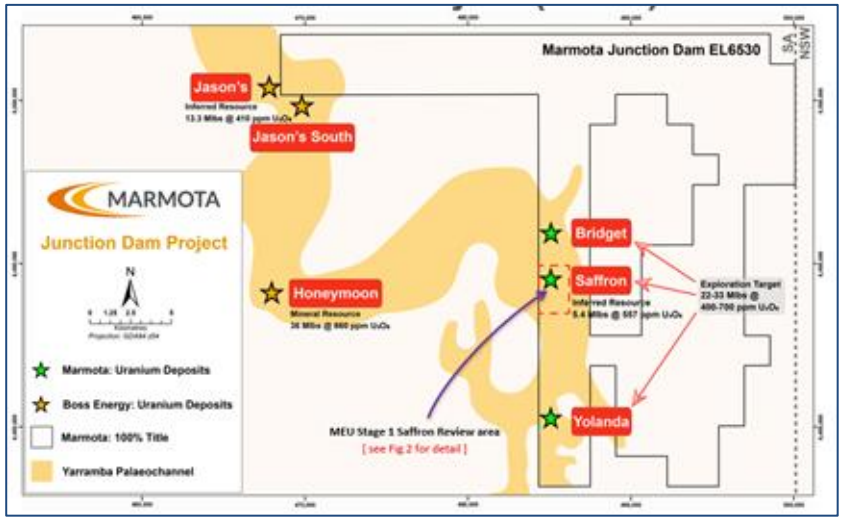

Junction Dam Uranium Project (100%)

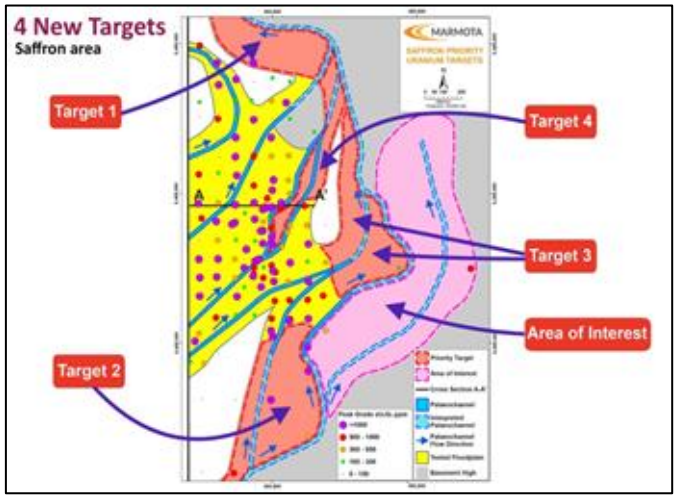

The Junction Dam uranium tenement (100% MEU) bookends both sides of the palaeochannel of the Boss Energy Ltd (ASX:BOE) Honeymoon uranium plant

Saffron (100%)

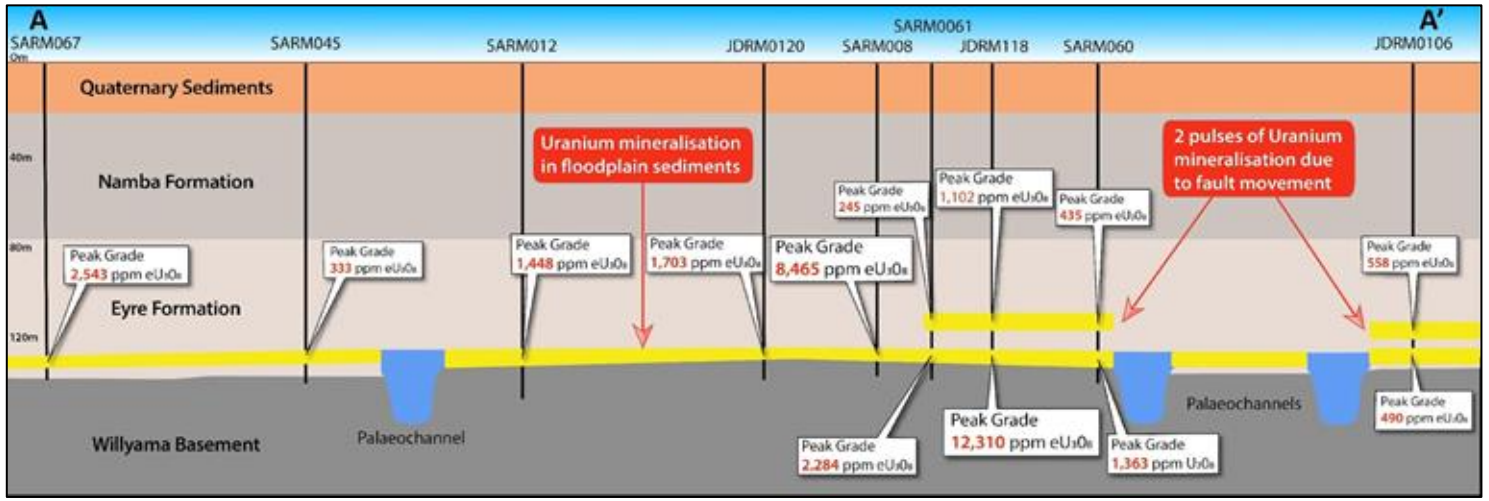

- **Resource:** 5.4Mlbs @ 557 ppm U3O8* (inferred)
- **Exploration:** stopped due to market downturn (Fukushima)
- **Prospectivity:** high + new untested zones
- **Targets:** multiple Tier 1 targets + large untested area
- **Drilling:** 164 holes planned

The Junction Dam uranium tenement (100% MEU) bookends both sides of the palaeochannel of the Boss Energy Ltd (ASX:BOE market cap ~ $1.1 billion) Honeymoon uranium plant

New drill targets at Saffron

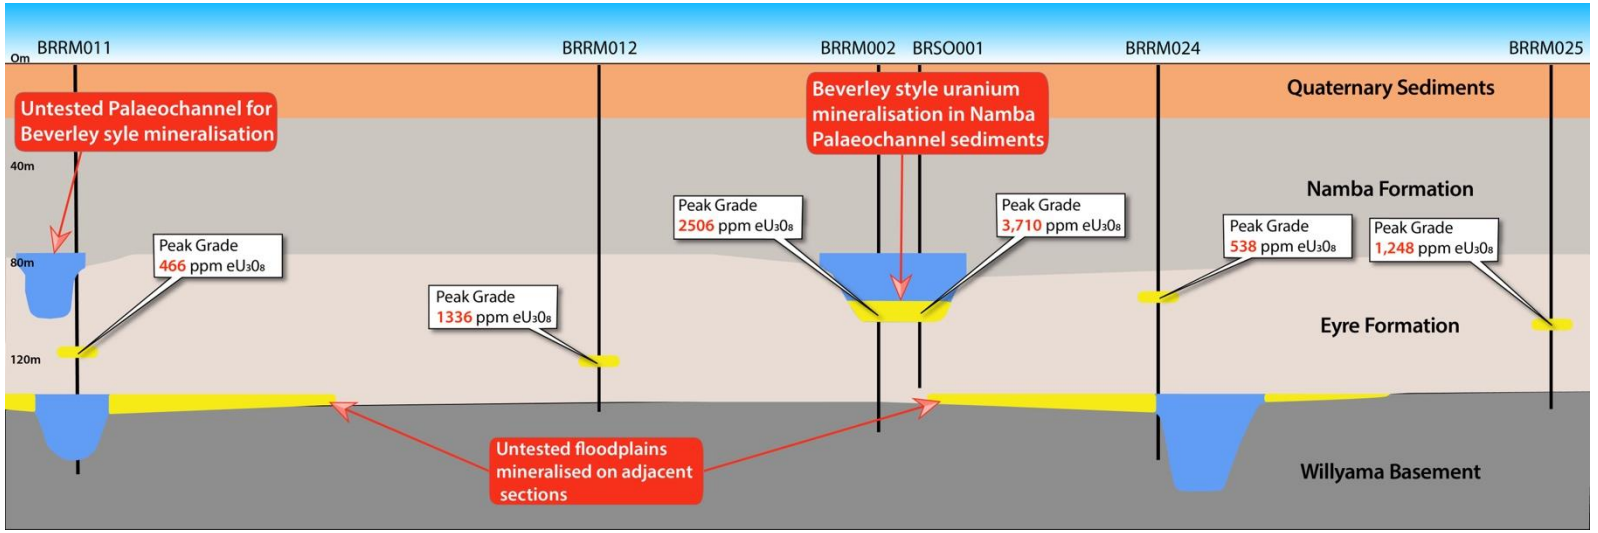

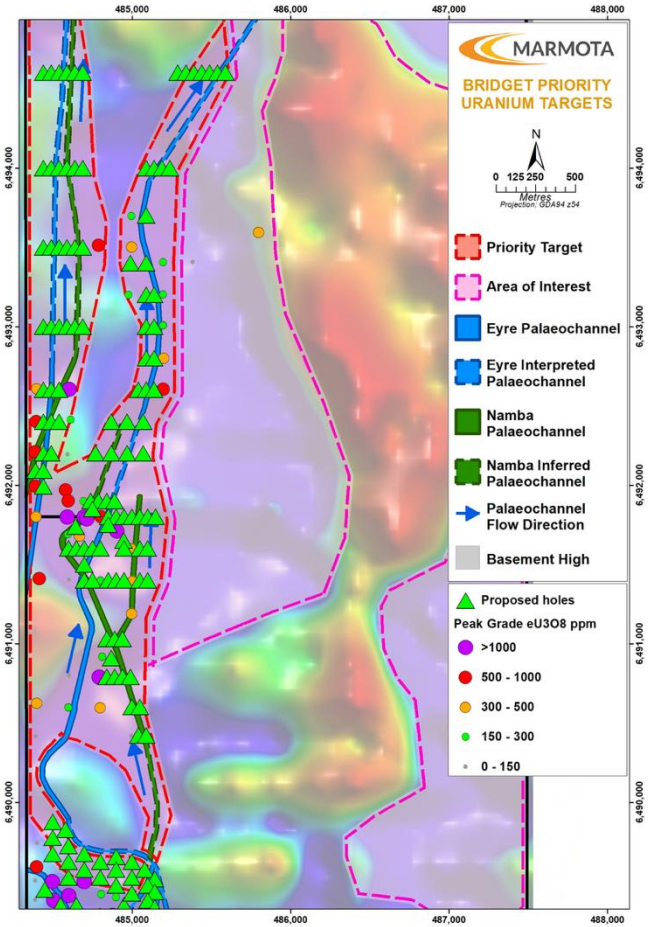

Schematic cross-section with a width of 600 metres across the Saffron Uranium Deposit

** ASX:MEU 18 Nov 2011, 20 Feb 2012, 17 July 2013*

Bridget (100%)

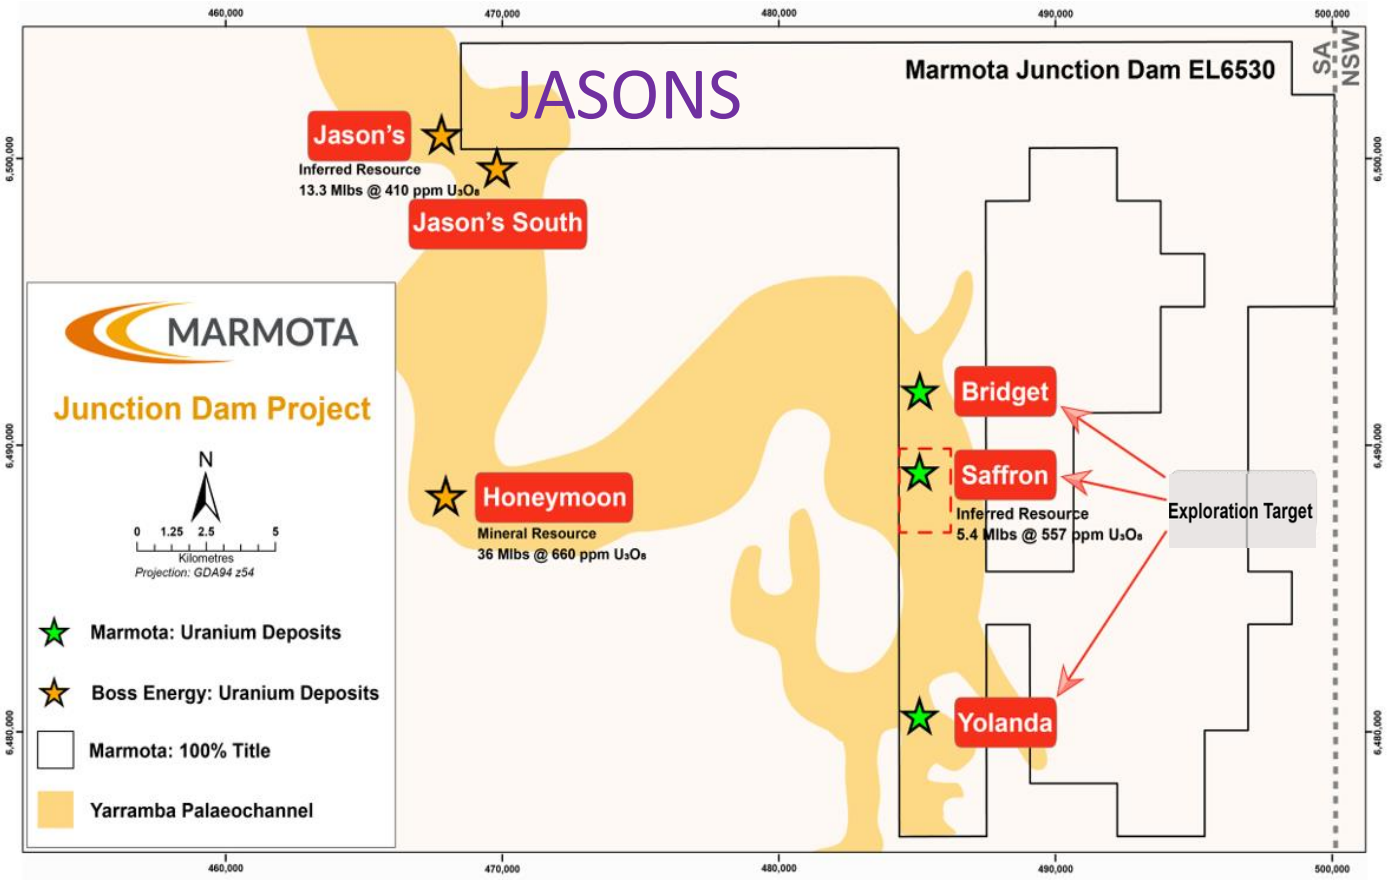

- **Drilling:** 114 holes planned
- **Mineralisation:** Beverley-style
- **Prospectivity:** High with potential to host large uranium resource
- **Palaeochannels:** Eyre & Namba Formations (2 distinct uranium systems, from 2 different geological ages, both coincident at Bridget)
- **Roll-front target:** material 20m high stacked uranium roll-front similar to Four-Mile Uranium Deposit (Beverley Mine)

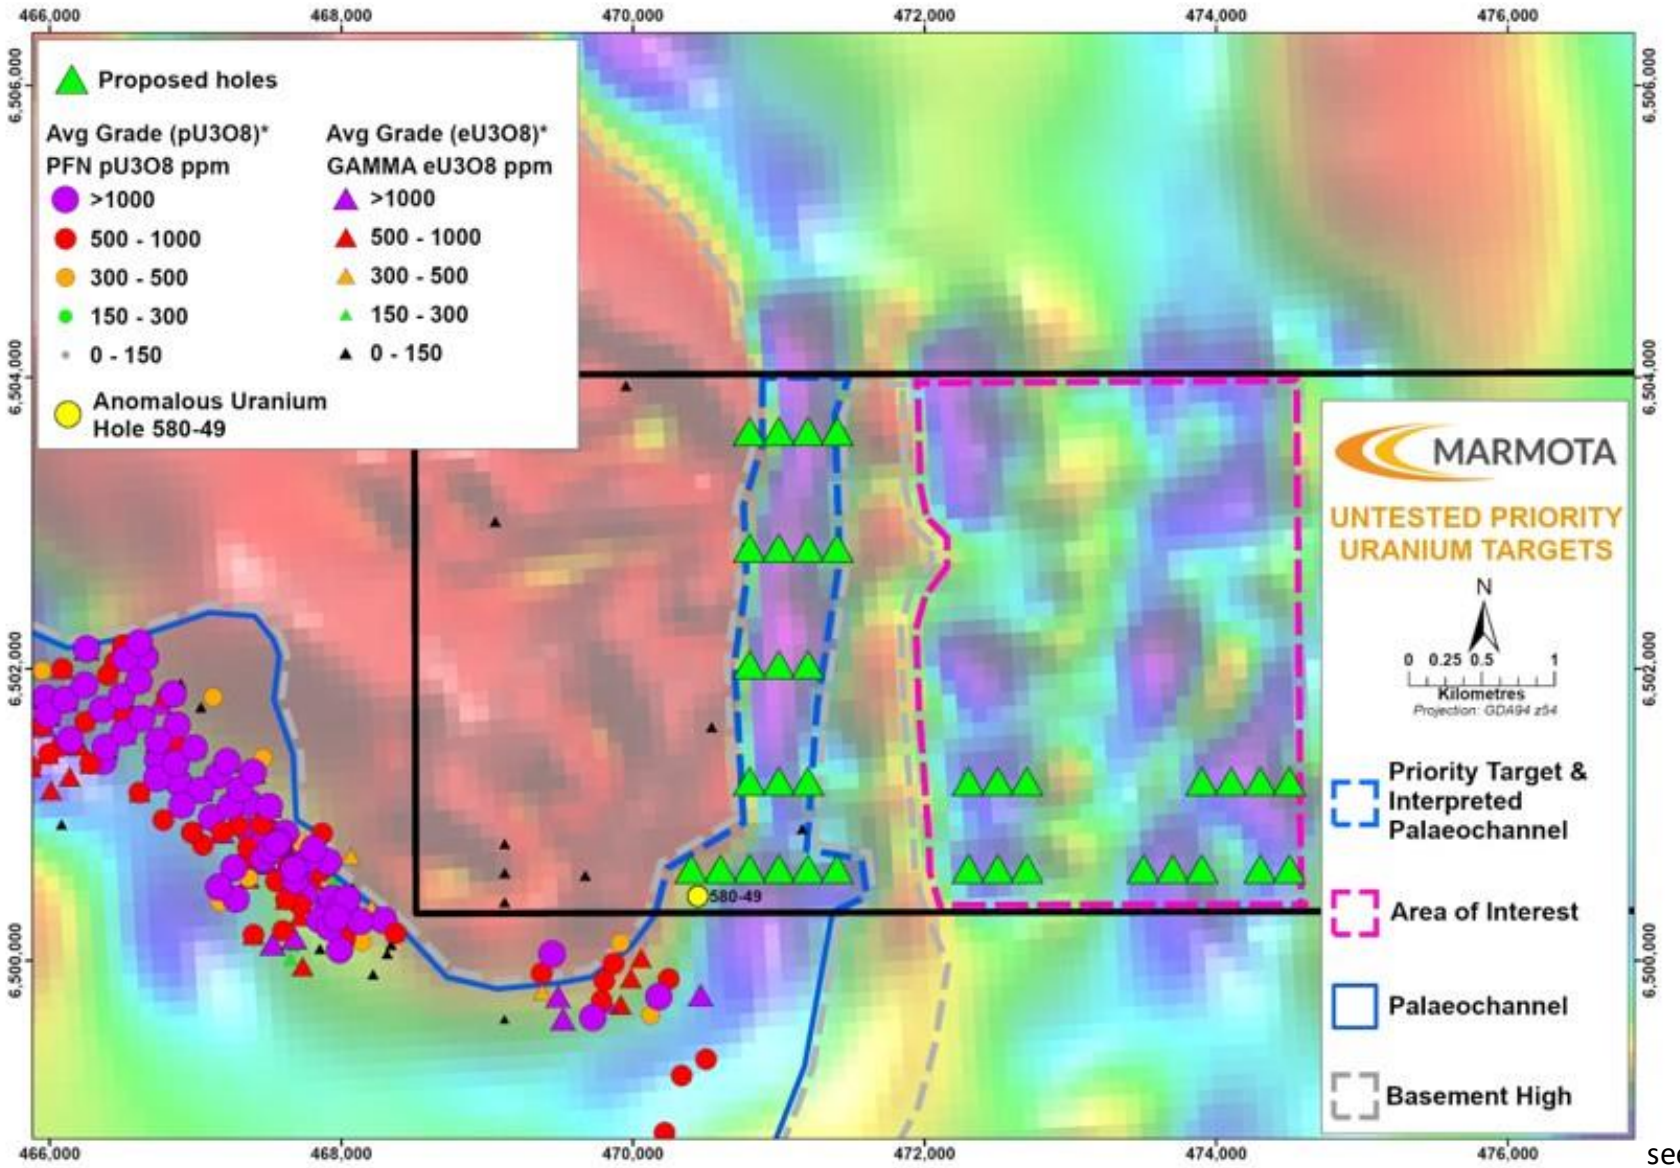

Jasons (100%)

- **Jasons:** Boss' highest-grade uranium resource
- **Proximity:** adjacent to Marmota's tenement boundary (see next slide)
- **Palaeochannel:** appears to continue into Marmota's ground (see next slide)
- **Drilling:** 24 holes planned
- **Potential:** for a high-grade discovery

Jasons anomaly extends to MEU's ground

see ASX:MEU 25 Mar 2026

Key Takeaway

- ✓ **Junction Dam is one of the most exciting uranium deposits in SA, in the premier uranium jurisdiction of Australia**
- ✓ **Dramatic change in perception of the potential of Junction Dam**
- ✓ **Boss is back in production. Marmota is perfectly located.**

This AGM Presentation includes information based on prior Marmota ASX:MEU releases which may be referred to for more detail, including:

26 Oct 2026	1 Oct 2026
28 May 2026	24 March 2026
26 Feb 2026	11 Dec 2026
18 Nov 2025	14 Oct 2025
28 Oct 2025	9 Oct 2025
29 May 2025	28 April 2025
20 Jan 2025	26 Nov 2024
13 Nov 2024	9 Oct 2024
30 Sept 2024	30 April 2024
9 April 2024	20 Nov2023
26 Oct 2023	20 Sept 2023
1 Sept 2023	1 Aug 2023
3 April 2023	21 Nov 2022
14 Oct 2022	29 Sept 2022
24 Aug 2022	16 June 2022
26 April 2022	31 March 2022
22 Feb 2022	23 Nov 2021
15 Nov 2021	12 Oct 2021
6 Oct 2021	4 Feb 2021
17 Dec 2020	4 Nov 2020
20 July 2020	24 June 2020
11 June 2020	21 May 2020
14 May 2020	8 April 2020
10 Oct 2019	19 Sept 2019
20 Aug 2018	27 Oct 2017
17 July 2013	9 July 2012
20 Feb 2012	18 Nov 2011

This release has been approved by the Board of Marmota.

Disclaimer

This presentation has been prepared by Marmota Limited ("MEU"). The information contained in this presentation is a professional opinion only and is given in good faith. Certain information in this document has been derived from third parties and though MEU has no reason to believe that it is not accurate, reliable or complete, it has not been independently audited or verified by MEU. Any forward-looking statements included in this document involve subjective judgement and analysis and are subject to uncertainties, risks and contingencies, many of which are outside the control of, and may be unknown to, MEU. In particular, they refer only to the date of this document, they assume the success of MEU's strategies, and they are subject to significant regulatory, business, competitive and economic risks and uncertainties.

Actual future events may vary materially from those in the forward looking statements. Recipients of this document are cautioned not to place undue reliance on such forward-looking statements. MEU makes no representation or warranty as to the accuracy, reliability or completeness of information in this document and does not take responsibility for updating any information or correcting any error or omission which may become apparent after this document has been issued. To the extent permitted by law, MEU and its officers, employees, related corporations and agents, disclaim all liability, whether direct, indirect or consequential for any loss or damage arising out of, or in connection with, any use or reliance on this presentation or information.

Cautionary Statement

Any estimates of exploration target sizes mentioned above should not be misunderstood or misconstrued as estimates of Mineral Resources. The estimates of exploration target sizes are conceptual in nature and there has been insufficient results received from drilling completed to date to estimate a Mineral Resource compliant with the JORC Code guidelines. Furthermore, it is uncertain if further exploration will result in the determination of a Mineral Resource.

Forward Looking Statement

This report may contain forward looking statements that are subject to risk factors which are based on MEU's expectations relating to future events. Forward-looking statements are subject to risks, uncertainties and other factors, many of which are outside the control of MEU, which could cause actual results to differ materially from such statements.
MEU makes no undertaking to update or revise the forward-looking statements made in this report to reflect events or circumstances after the date of this release.

Competent Persons Statement

Information relating to Exploration Targets, Exploration Results and Mineral Resources is based on information compiled by Aaron Brown, who is a Member of The Australian Institute of Geoscientists and an employee of Marmota. He has sufficient experience which is relevant to the styles of mineralisation, metallurgical testwork and types of deposits under consideration and to the activities being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the " Australasian Code of Reporting of Exploration Results, Mineral Resources and Ore Reserves." Mr Brown consents to the inclusion in this report of the matters based on this information in the form and context in which it appears.

Where results from previous announcements are quoted, Marmota confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcement and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.
